

PARENTAL INVOLVEMENT IN EDUCATION

The Board believes that parent/guardian involvement is an important part of the educational program.

The Board believes that student learning is more likely to occur when there is an effective partnership between the school and the student’s parents and family. Such a partnership between the home and school and greater involvement of parents in the education of their children generally result in higher academic achievement, improved student behavior, and reduced absenteeism.

In accordance with statute and the State Board of Education Parent and Family Involvement Policy, use of the term “families” is used in order to include children’s primary caregivers, who are not their biological parents, such as foster caregivers, grandparents, and other family members.

All parents/guardians of students enrolled in the district are encouraged to take an active role in the education of their children, and such persons will be informed of the following:

- A. The importance of the involvement of parents and caregivers in directly affecting the success of their children’s educational efforts;
- B. How and when to assist their children and support their children’s classroom learning activities;
- C. Techniques, strategies, and skills to use at home to improve their children’s academic success and to support their children’s academic efforts at school and their children’s development as future responsible adult members of society.
