

PROVISION OF COMPUTER POLICY

Each child enrolled in the School is entitled to a computer. The School shall provide each parent who is considering enrollment and each parent with a child enrolled in the School a written notice explaining this policy.

Election to One Computer per Residence

If more than one child living in a single residence is enrolled in the School, the parent may decide to have less than one computer per child as long as at least one computer is supplied to the residence. The parent may subsequently amend this request by providing a written notice. Within thirty days after providing notice, the School shall provide additional computer(s).

Waiver of Computer

The child's parent may provide a written waiver of their child's entitlement to a computer. The waiver shall affirm that there is a computer available to the child in the child's residence with sufficient hardware, software, programming, and connectivity to fully participate in all of the learning opportunities offered to the child. The parent and the School shall sign the waiver. The School shall maintain the original waiver and shall immediately submit a copy of the waiver to the Ohio Department of Education.

The parent may subsequently amend this decision by providing written notice. Within thirty days after providing notice, the School shall provide any additional computer(s) requested.

Stipends or Other Substitutes

The School shall not provide a stipend or other substitute to an enrolled child or the child's parent in lieu of supplying a computer to the child.
