

### **C.P.R. TRAINING**

Beginning with the 2017-2018 school year, instruction in cardiopulmonary resuscitation (“C.P.R.”) shall be provided at the School’s schools for students in grades nine through twelve. Instruction shall include the psychomotor skills necessary to perform cardiopulmonary resuscitation and shall be either of the following:

1. An instructional program developed by the American Heart Association or the American Red Cross that includes instruction in C.P.R.; or
2. An instructional program that is nationally recognized and based on the most current national, evidence-based emergency cardiovascular care guidelines for C.P.R.

No student shall receive certification in C.P.R. unless the student is trained by an authorized or certified instructor. A licensed educator does not have to be certified to provide training in the manner prescribed by this Board policy to facilitate, provide, or oversee instruction in C.P.R. that does not result in certification of students.

#### **Exceptions**

Upon written request of a student’s parent or guardian, a student shall be excused from taking instruction in C.P.R.

If a student is a child with a disability and is incapable of performing the psychomotor skills required to perform C.P.R., as indicated in the student’s IEP, the student shall not be required to receive instruction.

LEGAL REFS: O.R.C. §§3313.60; 3313.6021

Adopted: September 7, 2017
