CAREER ADVISING

This policy on career advising is to be updated at least once every two years and made available to students, parents, guardians and custodians, local post-secondary institutions, and School residents. The policy is to be posted in a prominent location on the School's website. This policy shall also be uploaded to the Ohio Department of Education's compliance web system.

Beginning with the 2015-2016 school year, the School shall provide:

1. Grade-level examples that link students' schoolwork to one or more career fields by implementing the Career Connections Learning Strategies offered by the Ohio Department of Education.

2. Career advising to students in grades 6-12, which includes meeting with each student at least once annually to discuss academic and career pathway opportunities.

3. Additional interventions and career advising for students who are identified as at risk of dropping out of school. These include:

    a. Identifying students who are at risk of dropping out of school using a local, research-based method with input from teachers, school counselors, and other appropriate school staff.

    b. Developing a Student Success Plan for each at-risk student that addresses both the student's academic and career pathway to successful graduation and the role of career-technical education, competency-based education, and experiential learning, when appropriate.

        Before developing a student's Student Success Plan, School staff will invite the student's parent, guardian, or custodian to assist. If that adult does not participate in the plan development, the School will provide the adult a copy of the plan, a statement of the importance of a high school diploma, and a listing of the pathways to graduation available to the student.

4. Training for employees on how to advise students on career pathways, including use of the tools available in OhioMeansJobs K-12 and other online sources provided by the School.

5. Multiple academic and career pathways through high school that students may choose to earn a high school diploma, including opportunities to earn industry-recognized credentials and postsecondary course credit.

6. Information on courses that can award students both traditional academic and career-technical credit.

7. Documentation on career advising for each student and student's parent, guardian, or custodian to review, as well as schools that the student may attend in the future. These include activities that support the student's academic, career and social/emotional development.

8. The supports necessary for students to transition successfully from high school to their postsecondary destinations, including interventions and services necessary for students who need remediation in mathematics and English language arts.
