

GRADING SYSTEMS

The Board of Education requires District personnel to communicate on a regular basis with parents about their child's academic performance and progress. To accomplish this, the District establishes grading systems appropriate to the age of the student that enables District personnel to monitor student achievement and progress in their courses of study, and to provide progress reports to parents on a regular basis.

The grading scales applied at the elementary school, junior high school, and high school are set forth in the Student and Parent Handbooks.
